TURN KEY SOLUTION:**

Our Products

About US

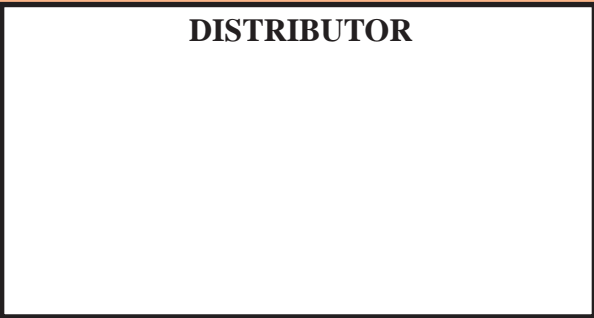

Mercedes Textiles Ltd is a 100% Canadian owned company that has been in the fire hose manufacturing business for over 45 years. We hold numerous hose patents, such as our innovative Mertex® lining method, which gives you the best flow for any hose size.

We also manufacture **high-pressure fire pumps**, and the accessories that are required between the water source and the fire.

As a world leader in this business, we are proud to put together these 4 "Protection Kits", that offer a **turn key solution** to cottage & home protection, as well as providing numerous value added uses.

Our products are supplied and maintained through distributors worldwide.

Cottage & Forest Home Fire Protection

One Stop Shopping

Kit A

The basic system (Kit "A") is comprised of :

- A WICK 100M 2 stroke, "high pressure fire pump"
- 3 lengths of 1 1/2" x 75' forest service quality fire hose
- Adjustable Forestry Fog Nozzle
- Plus all the other basics as described on the detailed panel.

Note: These light weight portable fire pumps weigh under 7.9 Kg / 17.5 lbs and are **"Very Easy Start"** because of our unique clutch operation.

Kit B

Kit "B" comes with all the accessories of Kit "A", plus :

- A Wye connection for parallel feeds
- An Adjustable Garden Hose Mini-Nozzle

In the event of fire, this option provides dual operations, plus added value features such as high pressure cleaning around the home, cottage, or boat.

At the same time the parallel feed can be used for watering lawn & garden, or could be connected to our sprinkler (optional for Kit "B").

Kit C

Kit "C" is intended to provide a sprinkler fire protection should there be a threat from an oncoming forest fire. Mercedes Textiles Ltd. supplies this protection system to numerous Provincial and State Forestry Departments to protect homes and cottages in remote areas against such an event. (Sprinkler poles not included in the kit, however can be made available, at extra cost, through our installation program).

For this concept, we offer the following :

- Our WICK 100M, with a combined internal and external Mercury style remote fuel connection
- Professional Forestry grade sprinklers, which provide a 33 M (100') diameter coverage
- Adjustable Forestry Fog Nozzle
- Forest service quality fire hose :
 - 1 length of 38mm x 23M (1 1/2" x 75')
 - 2 lengths of 38mm x 15M (1 1/2" x 50')
 - 2 lengths of 25mm x 8M (1" x 25')
- Plus the other basics described on the detailed panel.

Note: A remote fuel tank is a recommended option.

Kit D

Kit "D" provides for a full application with sprinkler protection and dual Hose Nozzle connections, as depicted in the above sketch. (Sprinkler poles not included in the kit, however can be made available, at extra cost, through our installation program).

For this concept, we offer the following :

- Everything that is included in Kit "C", plus
- Two water thieves and associated adapters, in order to provide the remote connections for a full application
- 2 lengths of 25mm x 23M (1" x 75') forest service quality fire hose
- 1 Adjustable Forestry Fog Nozzle, and 1 Adjustable Garden Hose Mini-Nozzle

Mercedes Textiles Ltd. can also supply numerous other high pressure pumps, synthetic (lay-flat) high pressure hose and Myti-flo® garden hose, as well as many other wildland products to meet your needs.

Note: Should your requirements surpass the basics of these 4 kits, we can tailor a solution to suit your particular situation.
